Advancing Innovation for Shared Prosperity

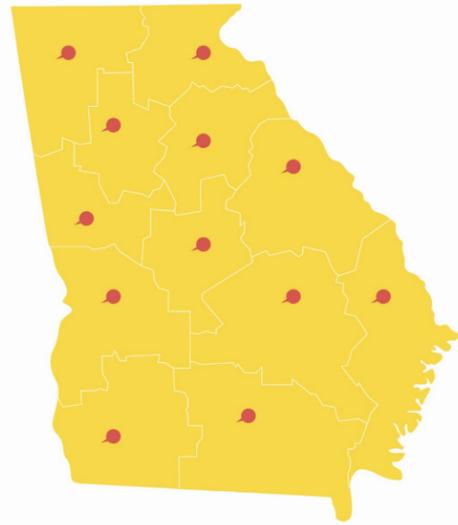

pingeorgia.com

Bringing Entrepreneurship and Innovation Across Georgia

It's well understood that Innovation and entrepreneurial activity has not been shared equally throughout Georgia. But until this research study there wasn't any precise insight into what the technology entrepreneurial landscape across the state looks like.

Community Connectivity and the Impact on Rural Prosperity

Access to broadband connectivity has become a necessity even for traditional industries across agriculture, education, finance and healthcare. But despite high demand, 23% of US households still can't access broadband internet service – underscoring the importance of efforts to make broadband as ubiquitous as electricity.

[Site Visit to Rome](#)

Thank you to the **Rotary Club of Rome, GA Independent College Association** and **Berry College** for hosting the Partnership. It was a great visit to learn about opportunities to partner at Berry and the **Spires at Berry College** where an older generation of innovators are connecting with students. That is innovation!

How Research Universities are Evolving to Strengthen Local Economies

Late Sen. Daniel Patrick Moynihan quipped that the way to create a great city was to "Create a great university and wait 200 years." America's network of research universities furnish talent, entrepreneurship and R&D — three inputs that fuel prosperity in the regions around great universities.

About

Launched in 2020, the Partnership for Inclusive Innovation is a public-private organization that was created to lead coordinated, statewide efforts to position Georgia as the leader for innovation, opportunity and shared economic success. The Partnership's focus pillars of community research, workforce development, student engagement and economic opportunity are a powerful combination that provides technical and financial support to open innovation through collaboration. Since 2020, the Partnership's work has catalyzed 30+ projects with local governments, universities, start-ups and nonprofits. The projects have created new businesses, increased access to financial and social capital, and deployed more than 170 technologies. More information is available at pingeorgia.org
